SUMMARY

M.S. Quantitative Economics candidate at San Francisco State University with 3 years of client-facing analytical experience at Apple and a background in financial advisory. Promoted to Senior level in 13 months in a metrics-driven sales environment. Builds financial models, ROI analyses, and live data dashboards in Excel, Python, SQL, and Tableau. Seeking a corporate finance or business analytics analyst role in the San Francisco Bay Area beginning Summer 2027.

EDUCATION

San Francisco State University, Lam Family College of Business

Expected May 2027

M.S. in Quantitative Economics (begins Fall 2026)

San Francisco State University, Lam Family College of Business

May 2026

B.A. in Economics | GPA: 3.5 | Dean's List (5 semesters) | First-Generation College Student

PROFESSIONAL EXPERIENCE

Apple, Berkeley, CA

Oct 2023 - Present

Sales Expert, Senior Level (Nov 2024 - Present) | Sales Specialist (Oct 2023 - Nov 2024)

- Promoted to Senior level within 13 months based on analytical performance and client relationship management in a high-volume, metrics-driven retail environment
- Exceeded quarterly performance benchmarks in every tracked period since hire, sustaining top-quartile results across sales attainment and customer experience metrics
- Analyze real-time performance data and KPI dashboards to identify sales trends, optimize customer engagement strategies, and inform business decisions at the store level
- Conduct structured needs assessments for hundreds of customers weekly, translating technical product details into tailored, data-informed recommendations
- Mentor junior team members on consultative selling and needs analysis, contributing to measurable improvements in team-wide performance metrics

Northwestern Mutual, Walnut Creek, CA

Aug - Nov 2025

Financial Advisor Intern

- Conducted client financial needs assessments and built client-facing financial plans covering risk mitigation, asset allocation, and tax-efficient investment structuring
- Evaluated client risk profiles, investment horizons, and liquidity needs to assess product suitability across insurance, annuity, and equity-linked instruments

SELECTED PROJECTS

Residential Real Estate Valuation Model, Chicago Metro Area

Python | Regression Analysis | Econometrics | Excel

- Built a multi-variable valuation model on 2,500+ residential transactions, using regression and econometric methods to quantify key price drivers including location, size, and market conditions

Entertainment Sector Investment Return Analysis

Python | Excel | Financial Analysis

- Analyzed a full-industry dataset to evaluate ROI trends across genres, studios, and release windows; identified high-yield investment characteristics and modeled performance benchmarks

U.S. Macroeconomic Indicators Dashboard

Python | FRED API | Tableau | Excel

- Developed a live macro monitoring dashboard tracking GDP growth, unemployment, inflation, and yield curve dynamics via the FRED API to support top-down economic and market analysis

SKILLS & CERTIFICATIONS

Data & Analytics: Excel (advanced), SQL, Python, Tableau, Stata, GitHub

Finance & Economics: Financial modeling, econometrics, financial planning, market analysis

Certifications: IBM Business Analyst | Google Project Management
